

Brainstorm & Idea Prioritization

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders

Step 1 – Team Gathering, Collaboration and Select the Problem Statement

Problem Statement: Manual creation and assignment of laptop configuration tasks after a standard laptop request causes delays and missed tasks.

Step 2 – Brainstorm, Idea Listing and Grouping

No.	Brainstormed Idea
1	Automate laptop procurement requests
2	Automatically create hardware configuration tasks
3	Automatically assign tasks to the Hardware Team
4	Send notifications when tasks are created
5	Track the status of laptop requests
6	Automate approval for standard laptop requests
7	Maintain a standard laptop catalog item
8	Generate reports for pending laptop requests

Step 3 – Idea Prioritization

Priority	Idea
1	Automatically create hardware configuration tasks
2	Automatically assign tasks to the Hardware Team
3	Track laptop request status
4	Send automatic notifications
5	Automate standard laptop approval

Selected Idea: Use ServiceNow Flow Designer to automatically create and assign a hardware configuration task whenever a standard laptop request is submitted.
