

Customer Journey Map – Streamlining IT Procurement

Scenario: Automating Standard Laptop Procurement

Customer Journey Map	Entice	Engage	Purchase / Fulfilment	Use	Extend
Steps	Employee needs a standard laptop	Submit laptop request	Automated approval & procurement	Receive and set up laptop	Support / replacement
Interactions	Employee checks available laptop options	Completes request form	System validates request and routes approval	Laptop delivered with required software	Employee contacts IT support when needed
Things / Touchpoints	IT portal, laptop catalogue	ServiceNow request form	Approval workflow, procurement system, email	Laptop, setup guide, IT portal	Service desk, support portal
Places	Employee's workplace / home	Employee portal	IT & procurement department	Office / home	IT service desk / online portal
People	Employee	Employee	Manager + IT + procurement	Employee + IT support	Employee + IT support team
Positive moments	Easy-to-understand laptop options	Simple request process	Fast automated approval	Laptop arrives ready to use	Quick support and issue resolution
Negative moments	Unclear specifications	Long or confusing form	Waiting for approvals / manual processing	Delayed delivery or setup issues	Slow support response
Areas of opportunity	Provide standard laptop catalogue	Pre-filled request form	Automate approval and procurement	Pre-configure laptop before delivery	Automated support and replacement reminders
Goals & motivations	"Help me choose the right standard laptop."	"Help me request a laptop quickly."	"Help me get my laptop without unnecessary delays."	"Help me start working immediately."	"Help me solve problems quickly."

How might we improve the journey?

1. How might we reduce the number of steps required to request a standard laptop.
2. How might we automatically approve requests that meet predefined criteria.
3. How might we eliminate repeated data entry.
4. How might we automatically trigger procurement after approval.
5. How might we provide real-time request status to employees.
6. How might we deliver laptops pre-configured and ready to use.
7. How might we automate replacement and upgrade notifications.
