

Customer Problem Statement

Project: Streamlining IT Procurement: Automating Standard Laptop Orders

Problem Statement (PS-1)

I am: an IT Procurement Team member.

I'm trying to: process standard laptop requests and ensure that configuration tasks are created and assigned to the Hardware Team.

But: the current procurement process involves manual task creation and assignment, which can cause delays and missed tasks.

Because: there is no automated workflow to generate and assign the required laptop configuration tasks after a standard laptop request is submitted.

Which makes me feel: frustrated and concerned about delays in fulfilling laptop requests for employees.
