Streamlining IT Procurement: Automating Standard Laptop Orders

User: IT Procurement Team Member

SAYS	THINKS
• "I need standard laptop requests to be processed quickly." • "The hardware team should receive the task automatically." • "I need to know the current status of each request."	• Manual task creation may cause delays. • Important requests or tasks could be missed. • An automated workflow can make the process more reliable.
DOES	FEELS
• Receives standard laptop requests. • Checks request details and approvals. • Creates or follows up on hardware configuration tasks. • Tracks request progress.	• Frustrated by repetitive manual work. • Concerned about delays and missed tasks. • Wants a simple and organized procurement process.
PAINS	GAINS
• Manual task creation and assignment. • Delays in processing laptop requests. • Difficulty tracking pending work. • Risk of missed or delayed configuration tasks.	• Automatic task creation. • Automatic assignment to the Hardware Team. • Better visibility of request status. • Faster and more consistent laptop procurement.

Empathy Insight: The IT Procurement Team needs a streamlined process that reduces repetitive manual work, automatically creates and assigns hardware configuration tasks, and provides clear visibility into laptop request progress.
