Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit

Problem: Standard laptop procurement can involve repetitive manual requests, approvals, tracking and fulfillment steps. This can create delays, inconsistent processing and additional effort for IT teams.

Solution: The project uses ServiceNow Flow Designer to automate standard laptop-order workflows, including request handling, approvals and task progression. Automation reduces repetitive manual work and provides a more consistent procurement process.

Target Group: Employees requesting standard laptops and IT/procurement teams responsible for processing and fulfilling those requests.

Expected Fit: The solution directly addresses the identified procurement delays and repetitive activities by applying an automated, standardized workflow for common laptop orders.

Purpose

- ☐ Solve the standard laptop procurement problem through an automated workflow.
- ☐ Reduce repetitive manual activities and improve process consistency.
- ☐ Provide a structured path for requests, approvals and fulfillment.
- ☐ Improve visibility and tracking of standard laptop orders.
- ☐ Understand the existing procurement process and improve it for the target group.

Template

Problem → Standard laptop requests require repeated manual processing and coordination.

Solution → Flow Designer automates the standard laptop-order process.

Customer/Target Group → Employees, IT support and procurement teams.

Value → More consistent processing, reduced manual effort and improved request tracking.
